*Employees come and go... Managing the devices allocated to them can be costly and time consuming.*

**ATG's Device Pool Management Program** addresses the issues of device turnover due to fluctuations in workforce device counts caused by Attrition, Growth and device Failure.

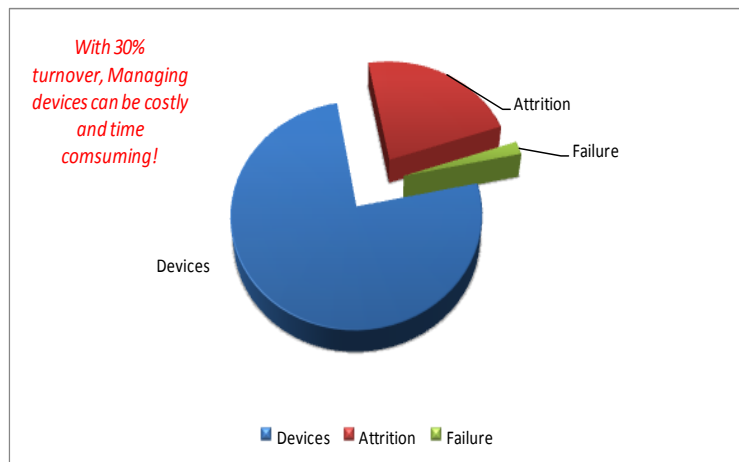

**ATG's Device Pool Management Program** Maximizes existing device investment and utilization by effectively managing turnover / attrition pools.

**ATG's Device Pool Management Program** will Minimize client IT support time by providing a Managed Service that is SLA/SLO based allowing Client IT support to focus on core issues.

**How it Works..**

**When an employee leaves the organization, the device is returned to ATG where it undergoes a series of task—example ;**

- ◆ Receiving of pool device
- ◆ Recording of pool device IMEI
- ◆ Removing and Recording Pool Device SIM/CTN
- ◆ Data Wiping of pool device as per ATG /Client Specs
- ◆ Cleaning / refurbing of Pooled Device
- ◆ Disposal of failed Pooled Devices
- ◆ Storage of Pooled Devices and SIMS
- ◆ Replacement of Pooled Devices with New or Refurbished Devices when applicable
- ◆ Client owner, CTN / mobile number Assignment on NEW ATG provided at&t SIM into at&t Phoenix provisioning system with required rate plan activation
- ◆ Recording of reassignment.
- ◆ Wiping and Disposal of old SIM
- ◆ Shipment of device (along with Client instructions) to new associate

**The devices held by ATG go thru a rigorous cleansing and refurb process. Client Inventory data is accessible on demand. Reallocating a device is a simple process notifying ATG that a specific device should be redeployed. ATG Activates the new SIM within at&t system matching the SIM and IMEI and Owner, provisioning the appropriate rate plan and shipping the new device.**
