Wilson Cellular Amplifiers _ Say GOODBYE to Dropped Calls!

In-Building Wireless Cellular 60 dB Amplifier (801106)

\$599

Features;

- Works with all generations of CDMA, TDMA, GSM and high-speed data technologies
- Improves data communication rates needed for 3G technologies.
- Automatic gain control up to 60 dB
- 2 dB gain step 30-60 dB
- Power control logic ensures maximum output power is within cellular standards
- Gain indicator lights
- Automatic shutdown on overload

Wireless Amplifier Cradle Kit (801213)

\$399

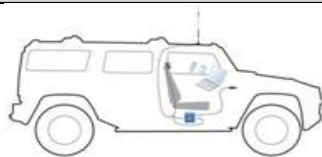

Features;

- Allows multiple phones and data cards to be used simultaneously
- Supports CDMA, TDMA, GSM and AMPS, in addition to 1x and 3x data protocols such as HSDPA, EVDO and EDGE
- Up to 3 watts maximum output power
- Power control logic ensures maximum output power is within cellular standards
- Requires no physical connection to cell phone or data card
- Provides high signal-to-noise ratio
- protects cell sites from harmful interference
- Dual band - Cellular and PCS
- FCC and IC type accepted

Wireless Amplifier Cradle Kit (801213)

\$24.95

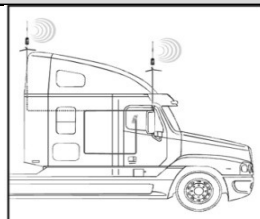

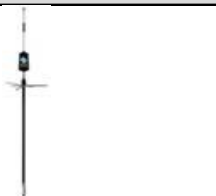

Features;

- Easy to install
- Removable - transfers from one vehicle to another
- Rare earth magnet
- Metal ground plane required (Minimum 3.5 in. Diameter)

Trucker Mirror Mount Cellular Antenna (301101)

\$39

Features;

- Works great on trucks, RV's, cars, boats, homes, or almost any other application
- No ground plane required - Built-in ground plane allows for use on any surface - metal, fiberglass, wood, etc.
- 19 inch fiberglass mast raises antenna above obstructions
- Mounting [options](#) available for any application
- Fits standard 3/8 inch x 24 threaded mount
