*“Solution Series “telenav track”**

telenav track

GPS Tracking Software for Vehicles, Fleets, Workers and Assets
Beat high fuel costs and manage for success

TeleNav Track is GPS tracking software that helps you better manage your mobile workers, vehicles and expensive equipment. But TeleNav Track is much more than just GPS tracking—it is powerful, web-based mobile workforce software that improves the efficiency of your mobile teams, reduces fuel and overtime costs and enhances service levels—using a simple handheld cell phone

GPS Location and Tracking

See the field in near real time.

TeleNav Track gives you so many ways to understand and manage the location and history of your mobile workforce and assets, beginning with who, what, why, where, and when – in multiple views, applying multiple filters and functions. You can even setup TeleNav Track to see critical data in one-minute intervals to really keep your finger on the pulse.

- View employee and job status on a map using a browser
 - View employee and job status from your cell phone
 - Receive alerts when workers or vehicles enter or exit a specific area
 - Receive alerts when vehicles have stopped or are speeding
- View breadcrumb reports of where your workers or vehicles have been

Call us today to find out how ATG can help you position the value of the “telenav track” with your customers!!!!
